Firebase

## PROJECTS

### Rashara's App (11/2023 - Present)

- Rashara's App is a project tailored for athletes and coaches. Implemented functionality for users to create organizations and onboard coaches.
- Using React Native with TypeScript, Node.js, Express.js and Firebase to ensure efficient implementation of project features and functionalities.
- Designed features allowing coaches to manage players by adding them under their supervision. Enabled coaches to create customised plays for various sports such as football, basketball etc., that empowered coaches to select players and form teams within the application.

### Esskay Systems (02/2023 - 10/2023)

- Led the development of Esskay Systems, a comprehensive dashboard facilitating client oversight of IoT device usage that enable users to effortlessly add devices using unique codes and provided real-time data visualisation through interactive charts and graphs.
- Leveraged React hooks, TypeScript, Redux, React Charts and AWS S3 to ensure efficient implementation of project features and functionalities.
- Successfully managed a team throughout the project lifecycle, facilitating collaboration and ensuring project milestones were met.

### 21K Schools (01/2022 - 01/2023)

- Led the development of 21k Schools, a Learning Management System (LMS) built on React, facilitating seamless onboarding for schools and content upload functionality.
- Contributed as a Frontend Developer, crafting numerous reusable components to optimize development efficiency.

## ACHIEVEMENTS

### Core Organizer - Google Developers Group, Indore (2017 - Present)

Volunteered with the GDG Indore community to raise technical awareness in emerging fields among students and professional developers in the city.
